EDUCATION

Rajamangala University of Technology Tawan-Ok

- Bachelor of Science degree in Computer Science

EMPLOYMENT - FRONT-END DEVELOPER

UC Connect Co., Ltd.

Jan 2021 - Feb 2022

- Developed systems front end using Vue CLI, Nuxt.js or Next.js (depending on the project)
- Design Wireframe on Adobe XD or Figma

Riverpark Consultant Co. Ltd.

Mar 2022 - Present

- Developed systems front end using Next.js (depending on the project)

WORK EXPERIENCE

EMCS Thai Co., Ltd. - CRM (Development) Phase 2 - Nuxt.js

- I developed a report module for all data from MongoDB database. Display data in graph format and can be managed in CRUD. I using Bootstrap Vue, UI Kit and Billboard Chart in development

AXA Insurance Thailand - LMS (Development) - Next.js

- Design wireframe module Stock management, Monthly plan, Training plan, Manage Class.
- I developed a E-Testing module. In this module can create a test for insurance agents. There are a total of 7 types: single-choice, multiple-choice, weight, matching, true-false and paragraph.

CRM Demo Version (Development) - Nuxt.js

- I developed a chat-line module using vue-socket.io
- Master data management and this dataset will be used for the entire project.
- User and role management (permission module) is that the user will be limited by the administrator

TTB - CRM (Development) - Vue.js

- I developed a ticket module, line chat module using vue-socket.io, master data module
- A ticket that connects to a webview (iframe) and sends/receives data back and forth on webview.
- Master data management and this dataset will be used for the entire project.

Tokiomarine - PDPA Agent Project (Development) - Next.js

- I develop a system based on assignments every Sprint.
