Summary

Senior Software Engineer at Datapro Computer Systems (DCS), Premier Group, with 5+ years of experience building enterprise web applications for insurance, banking and manufacturing clients, including MSIG, Krungthai Bank, Nissan Leasing, Denso and Thai Honda. I design in Figma, build in Angular, Vue and React, and deliver back-end APIs in Java and Node.js. My work runs from requirements through SIT and UAT to production, as on MSIG's Marine Insurance Portal, which went live in December 2025.

Experience

Senior Software Engineer, Datapro Computer Systems Co., Ltd. (DCS), Premier Group

Jun 2024 – Present · Bangkok

- **MSIG Marine Insurance Portal (Oct 2025 – Present):** Phase 1.1 went live in production in Dec 2025. I built user and role management, the maintenance modules and the login and password-recovery flows in Angular. In Phase 1.2 (about 87% complete) I built the policy, certificate, monthly processing, authorization and report modules from my own Figma mock-ups, with Jest unit tests.
- **MSIG premium formulas:** Wrote the calculation formulas for endorsing and cancelling policies in every policy class (v5.1), which MSIG confirmed, and documented the flows for SIT.
- **Nissan Leasing loan insurance system (Jun 2026 – Present):** Built it full-stack: OTP login, a hire-purchase and balloon-loan premium calculator, PDF forms and Excel export on the front-end, plus Java APIs and a webhook connecting to MSIG. Fixed penetration-test findings. The system passed UAT and goes live in Nov 2026.
- **Krungthai Bank DLP platform (Aug – Sep 2025):** Built the front-end for data asset monitoring, quarantined email, inquiry and approval pages, and connected them to the APIs.

- **Denso (Jan 2025 – Apr 2026):** Built Frontier planning screens and reports, rebuilt the CSA system's UI through three rounds of client mock-up reviews, and built full-stack CRUD for Inventory Control.
- **Thai Honda web portal and Web Career (Jul – Dec 2024):** Designed desktop and mobile UI plus a 10-module admin back-office in Figma in about three weeks, then built the front-end and deployed it through a GitLab pipeline.

Front-end Developer, Buzzebees Co., Ltd.

Oct 2022 – May 2024 · Bangkok

- Built the Shopping Cart & My Order module that many loyalty apps use, with payment in Baht, points or both, promo codes, coupons, auto discounts and API-driven theming.
- Maintained the Vue/React template behind client projects, and implemented Design Tokens (Style Dictionary) so the subscription demo product supports multiple themes.
- Built LINE LIFF campaign and privilege apps for clients such as 101 True Digital Park and Seacon Plus.

Front-end Developer, Riverpark Consultant Co., Ltd.

Mar 2022 – Sep 2022 · Bangkok

- Built user management for insurance agents in Tokio Marine's PDPA document management system (Next.js, Material UI).

Front-end Developer, UC Connect Co., Ltd.

Jan 2021 – Feb 2022 · Bangkok

- Designed the wireframes for AXA Insurance's learning management system and built its e-testing module (six question types) and e-certificate module.
- Built real-time chat (Socket.io), ticketing and master data modules for TTB's CRM and the CRM demo product, plus a MongoDB reporting module for EMCS Thai.

Skills

- **Front-end:** JavaScript, TypeScript, HTML5, CSS, Angular, Vue.js, Nuxt.js, React, Next.js, Tailwind CSS, Bootstrap, MUI, Vite, Webpack
- **Back-end & Data:** Java, Node.js, PHP (CodeIgniter), REST APIs and webhooks, MySQL, SQL Server, MongoDB

- **Quality & Delivery:** Jest unit testing, SIT/UAT support, Postman, GitLab CI/CD, GitHub, security fixes (penetration testing, npm audit)
- **UI/UX Design:** Figma, Adobe XD, Visily, wireframing, design systems & Design Tokens (Style Dictionary)
- **Platforms & Tools:** LINE LIFF / LINE OA, Socket.io, JWT, Jira, Asana

Education

B.Sc. Computer Science, Rajamangala University of Technology Tawan-Ok · Aug 2020

Training & Certifications

- Unlock Skill UX/UI, 4th generation, UXUI.STUDIO (2021)
- Information Security Awareness and AI Governance training, DCS (2026)
- Google Opal Workshop (2026)
