Teetouch Asawasupakul

Senior Software Engineer · Front-end Developer & UI Designer

Bangkok, Thailand · (+66) 85 857 8357 · teetouchnaja@gmail.com · linkedin.com/in/teetouch-asawasupakul · github.com/saintnaja12 · Portfolio: teetouch-portfolio.vercel.app

Summary

Senior Software Engineer with 5+ years of experience building enterprise web applications for clients in insurance, banking and manufacturing, including MSIG, Krungthai Bank (KTB), Nissan Leasing, Denso and Thai Honda. I design interfaces in Figma, build them in Angular, Vue/Nuxt and React/Next, and deliver back-end APIs in Java and Node.js. I have taken projects from requirements through SIT, UAT and production go-live, including MSIG's Marine Insurance Portal.

Experience

Senior Software Engineer, DCS (Premier Group): Technical Programming Unit

Jun 2024 – Present

I deliver front-end development, UI design and back-end/API work on client projects, taking them from requirements through SIT and UAT to production.

MSIG: Marine Insurance Portal · *Oct 2025 – Present*

- Phase 1.1 went live in production in Dec 2025. On it I built user and role management, the node & email and group maintenance modules, the new login and password-recovery flows, and encrypted data in local storage (Angular).
- Phase 1.2 (from Jan 2026, about 87% complete at the end of Oct 2026): set up the front-end routing and code structure and wrote Jest unit tests. Built the auth flow and the policy, certificate (edit, inquiry, copy, endorse, cancel), monthly processing, request authorization, report and system-setting modules from Figma mock-ups I designed.
- Wrote the premium calculation formulas for endorsing and cancelling policies in every policy class (v5.1), which MSIG confirmed, and documented the endorse/cancel flows for SIT.

Nissan Leasing: Loan Insurance System integrated with MSIG · *Jun 2026 – Present*

- Built the system full-stack. The front-end covers OTP login, a premium calculator for hire-purchase and balloon loans, draft and submit flows, PDF application forms, policy inquiry and Excel export. On the back-end I built Java APIs that connect to MSIG services, including a webhook that updates policies.
- Handled data migration, encryption against XSS, API logging, email notifications and reconcile reports, plus fixes from penetration testing and dependency security fixes (npm audit, Log4j).
- The system passed UAT and I am preparing the production configuration for go-live in Nov 2026.

Krungthai Bank (KTB): DLP (Data Loss Prevention) Platform · *Aug – Sep 2025*

- Built the front-end for Data Asset Monitoring & Remediation, Quarantined Email, Inquiry, Department and Approval Process, applied the bank's theme, and connected the pages to the APIs.

Denso: Frontier, CSA, Claim & Inventory Control · *Jan 2025 – Apr 2026*

- **Frontier Phase 2:** Built Repositioning Plan input with a downloadable report, plus the Daily Usage Plan forms and actual/plan tables.
- **CSA (New Design):** Rebuilt the UI on the Mazer Admin template through three rounds of mock-up reviews with the client, revised the whole system from their feedback, and deployed it to the test environment.
- **Claim and Inventory Control:** Planned the Claim system's work breakdown (WBS) and fixed issues from feedback, and built Inventory Control's plant CRUD on both front-end and back-end.

Thai Honda: Corporate Web Portal & Web Career · *Jul – Dec 2024*

- Designed desktop and mobile UI in Figma, with reusable components and user-flow presentations for the client.
- Designed the 10-module admin back-office in about three weeks: users, roles & permissions, consent, homepage, job careers, job applications, news & events, Life in Thai Honda, company profile and contact.
- Built the web portal front-end (project setup, login, user management), connected the APIs and deployed through a GitLab pipeline. Launched Web Career with image upload and handled the post-launch fixes.

Other work

- Built AutoSpec Generator for the internal hackathon, covering UI design, project setup and the presentation (2025).
- Built a LINE OA table-reservation POC for Shuang Hor, and created the proposal and UI for Yuvabadhana Foundation's online scholarship system.

- Coached teammates on Figma and on Marine Portal modules.

Front-end Developer, Buzzebees Co., Ltd.

Oct 2022 – May 2024

- **Shopping Cart & My Order (product module):** Built a cart and order system used across many apps, with payment in Baht, points or both, promo codes, coupons, points-to-discount, auto discount, related campaigns, delivery and tax addresses, and theming configured via API.
- **Buzzebees Template & Demo (subscription product):** Maintained the Vue/React template that client projects are built on, and researched and implemented Design Tokens (Style Dictionary) to support multiple themes.
- **Client projects (101 True Digital Park, Seacon Plus):** Built campaign and privilege redemption apps on LINE LIFF, connected to the cart, using Node.js for login and routing.
- **Buzzebees POS:** Built the campaign and privilege data management system.

Front-end Developer, Riverpark Consultant Co., Ltd.

Mar 2022 – Sep 2022

- **Tokio Marine, PDPA Agent:** Built a user management system for insurance agents with Next.js.

Front-end Developer, UC Connect Co., Ltd.

Jan 2021 – Feb 2022

- **AXA Insurance, LMS:** Designed wireframes for the stock management, monthly plan, training plan and class management modules, and built an e-testing module with six question types for insurance agents.
- **TTB, CRM:** Built the ticket and real-time chat modules (Socket.io), including two-way data exchange with an embedded webview.
- **EMCS Thai, CRM Phase 2:** Built a report module that charts data from MongoDB, plus CRUD for data management (Nuxt.js).
- **CRM Demo:** Built the chat module, master data management, and user and role management.

Skills

- **Front-end:** JavaScript, TypeScript, HTML5, CSS, Angular, Vue.js, Nuxt.js, React, Next.js, Tailwind CSS, Bootstrap, MUI, Vite, Webpack

- **Back-end & Data:** Java, Node.js, PHP (CodeIgniter), REST APIs and webhooks, MySQL, SQL Server, MongoDB
- **Quality & Delivery:** Jest unit testing, SIT/UAT support, Postman, GitLab CI/CD, GitHub, security fixes (penetration testing, npm audit)
- **UI/UX Design:** Figma, Adobe XD, Visily, wireframing, design systems & Design Tokens (Style Dictionary)
- **Platforms & Tools:** LINE LIFF / LINE OA, Socket.io, JWT, Jira, Asana

Education

B.Sc. Computer Science, Rajamangala University of Technology Tawan-Ok · Aug 2020

Training & Certifications

- Unlock Skill UX/UI, 4th generation, UXUI.STUDIO (2021)
- Effective Communication, DCS (2024)
- Information Security Awareness Training, DCS (2026)
- AI Governance: From Nice-to-Have to Mandatory, DCS (2026)
- Google Opal Workshop (2026)
